

SRISTHI SAHA

Phone: +91 74390 72758 | Email: Shyamalsaha558@gmail.com | India (Open to Remote)
LinkedIn: linkedin.com/in/sristhi-saha | GitHub: github.com/SristhiSaha | LeetCode: 120+ Solved

EDUCATION

Chandannagar Institute of Management and Technology

2023 - 2027

Bachelor of Computer Application (BCA)

CGPA: 8.5 / 10.0

WORK EXPERIENCE

Orbital Webworks

July 2025 - Present

Frontend Developer

Remote, India

- Developed and optimized live web applications using React.js and Next.js, improving page load speed by leveraging lazy loading, code splitting, and image optimization techniques.
- Built and maintained responsive, mobile-first websites using WordPress and custom React components, ensuring cross-browser compatibility and accessibility (WCAG) standards.
- Collaborated with designers and backend developers to deliver pixel-perfect, accessible interfaces.
- Built reusable, cross-browser compatible UI components ensuring consistent user experience across devices.

TECHNICAL SKILLS

Languages:	C, C++, JavaScript, Java, TypeScript
Frontend:	HTML, CSS, Bootstrap, React.js, Next.js, Tailwind CSS, Framer Motion, GSAP, Redux
Backend:	Node.js, Nest.js, Express.js, WebSockets, JWT Auth, Microservices, RESTful APIs
Database:	MongoDB, MySQL, Mongoose, PostgreSQL, Redis
Tools & Cloud:	Git, GitHub, Docker, Postman, npm, Nginx
AI / APIs:	Gemini AI API, Prompt Engineering, LangChain, LangGraph, RAG pipelines
CS Fundamentals:	OOP, Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS

PROJECTS

Zyra AI - Enterprise-Grade Autonomous Agentic AI Platform

Group Project (5 Members) | Ongoing

- Developed an AI-powered enterprise platform using a Modular Monolith built with Hexagonal Architecture and event-driven communication via RabbitMQ for scalable module interaction.
- Built backend APIs using NestJS, TypeScript, PostgreSQL, and Drizzle ORM, with Redis integrated for caching and performance optimization.
- Contributed to RAG pipelines, AI orchestration, and distributed memory architecture; collaborated on system design, database modeling, and API development.
- Tech Stack: NestJS, TypeScript, Next.js, PostgreSQL, Drizzle ORM, Redis, RabbitMQ, LangChain, LangGraph, Pinecone/Weaviate, Docker, Nginx, WebSockets, SSE.

MockMate AI - AI Mock Interview Platform

MongoDB, Express.js, React.js, Node.js, Gemini API

- Built a full-stack AI-powered mock interview platform using MERN (MongoDB, Express.js, React.js, Node.js).
- Integrated Gemini AI API to generate personalized interview questions based on user's resume and target job role.
- Implemented AI-driven response evaluation using Gemini API to generate real-time performance feedback.
- Designed a results dashboard using Recharts to visualize performance metrics and track improvement across interview attempts.

AduArchive - Academic Review & Plagiarism Platform

MongoDB, Express.js, React.js, Node.js

- Developed a full-stack web platform using MERN with role-based access control for multiple user types.
- Designed RESTful APIs and MongoDB aggregation pipelines to power a real-time review and rating system.
- Integrated Gemini AI API to build a plagiarism detection system and an AI chatbot for faculty/user support.
- Built a responsive, mobile-first UI with React.js and Tailwind CSS; deployed the application to production.

ACHIEVEMENTS & LEADERSHIP

- Competitive Programming: Solved 120+ DSA problems across LeetCode and GeeksforGeeks.
- Participated in a Science Fest at Abacus Institute of Management and Technology, demonstrating enthusiasm for technical innovation.
- Led a 4-member team in a college hackathon, coordinating development, task allocation, and the final presentation.
